La Région
Auvergne-Rhône-Alpes

foreword

As the top French Region for digital technology, the Auvergne-Rhône-Alpes Region boasts one of the most dynamic ecosystems in Europe and even the world. We welcome all who are driven by a thirst for audacity and innovation. Whether you are a startup or major company, our dynamic Region can match your ambition to create the world of tomorrow.

French Tech is now well known around the world, and Auvergne-Rhône-Alps, the first industrial area in France, has already launched the digital revolution. Our new digital campus is a lab of the future dedicated to innovative and disruptive digital training models which provide challenging opportunities for our students. With endorsements from most innovative leading tech companies, Auvergne-Rhône-Alpes Campus will become the new home of engineering talent for the digital industry in Europe.

From Grenoble to Lyon, Saint-Etienne to Clermont-Ferrand, our major innovations hub, the richness of our industrial heritage and the diversity of our expertise has made our region a "ninja of innovation" to borrow from Gary Shapiro. The vibrancy of our clusters and our centers of competitive excellence, such as Minalogic and Imaginove, is limitless. The automotive industry, IoT, bioTech, technical textiles, design tech, 3D printers, video games, sportTech... we have outstanding ambitions in each of these sectors and industries which are experiencing rapid growth thanks to the vibrancy of our clusters and our centers of competitive excellence.

Once you've seen us at CES, come to the Auvergne-Rhône-Alpes Region, where you'll find everything you need to develop your projects and make your dreams a reality. That is my pledge to you, and the promise of an entire area where innovation is our passion.

I hope you enjoy the 2018 International CES!

Laurent Wauquiez
President of Auvergne-Rhône-Alpes.

Auvergne-Rhône-Alpes, the Tech Region

FRANCE

EUROPE

2ND
Most attractive French region for *foreign investment*

1ST
*Industrial region* in France in terms of employment

2ND
Region in France in terms of employment in the *digital industry* (90 000 jobs)

LARGEST EUROPEAN CLUSTER DEDICATED TO THE DIGITAL ECONOMY

Major companies:
Adept, Almerys, ARM, Autodesk, Awabot, BD, Cegid, Criteo, CG – Crompton Greaves, ESKER, Esri, Forgerock, GE, HP, Intel, Mathworks, Oracle, Orange L@bs, Salesforce, Schneider Electric, Siléane, Staubli, STMicro, Visiativ, Naver Labs…

Clermont Auvergne French Tech

French Tech in the Alps Grenoble

*Grenoble #5 most **inventive city** worldwide (forbes)*

Leaders & Partners #1

MINALOGIC
The operator of the CES 2018

Minalogic is a global innovation cluster for digital technologies serving France's Auvergne-Rhône-Alpes region. The cluster supports the region's leading innovators by facilitating networking, fostering collaborative R&D, and providing companies with personalized assistance throughout all phases of business growth. The products and services developed by our members address all industries, from ICT and healthcare to energy and advanced manufacturing.

Founded in 2005

Boasts nearly 400 members

Including 350 Industrial members

500 projects certified

550 projects that have secured total government funding of €850 million of the more than €2 billion in total R&D spending these projects represent.

Minalogic has been a certified "Gold Label" Cluster of Excellence since 2012.

AUVERGNE-RHÔNE-ALPES ENTREPRISES
Booth 51050

Auvergne-Rhône-Alpes Entreprises helps companies, in particular start-ups, to grow in the Auvergne-Rhône-Alpes Region, in France and in international markets.

Our missions

Assist companies in their set-up in Auvergne-Rhône-Alpes: technical and financial support, networking…

Support companies in their international and innovation projects, for example by organizing *regional booth* in trade shows and *business conventions* dedicated to IT and industrial sectors.

Contribute to the dynamics of regional clusters

Promote the Auvergne-Rhône-Alpes region and its economic development.

Leaders & Partners #2

DIGITAL LEAGUE

With more than 530 members, Digital League is the largest high-tech business network in Auvergne-Rhône-Alpes.

Our members come from various branches such as software development, e-commerce, IT consulting, social media, IT security, software architecture, media agencies but also schools and research laboratories.

Whatever their size, we support businesses from the IT and high-tech industry in all stages of their development, especially in 3 missions:

▸ FEDERATING:
Strength in uniting digital companies, digital schools, universities, laboratories and digital research departments

▸ GROWING:
Growth for digital companies by sharing best practices in Sales & Marketing, HR & Training, Management & Funds, R&D & Technologies

▸ INFLUENCING:
Impact for our companies via wider visibility of activities on a regional, national and international level

#1 IT cluster in France with 530 members, 26.000 employees and 2,6 billons€ turnover.

imaginove

Since 2006, Imaginove has been a French triple-helix cluster, focused on the convergence of ICT and CCI industries and on the expansion of projects and businesses in digital content and services industry in the Auvergne- Rhône-Alpes Region.

Imaginove assembles almost 200 members (SMEs,academics, researchers, laboratories, R&D centres and universities) and supports them in R&D activities, collaborative projects, business development, new business models, access to finance (public and private), networking and internationalization.

Imaginove aims to:

▸ Boost the innovation and competitiveness of the ICT and CCI Industries focused on 3 creative universes (gaming & gamification, culture and knowledge, smart-living)

▸ Promote business models that encourage the search for new digital technologies (ex. Content, Data, VR)

▸ Contribute to the development of R&D in all fields related to the ICT and Creative sectors.

FROM RESEARCH TO INDUSTRY
cea tech

RESEARCH & TECHNOLOGY ORGANIZATION
Speeding innovation for industry

CEA Tech's innovation-driven culture develops technologies that ensure industry's competitiveness across multiple markets

With 4,500 multidisciplinary researchers in three labs —Leti, Liten and List— it combines deep expertise and world-class pre-industrialization facilities to focus strategically on global challenges such the digital transformation, clean & safe energies, health & wellness, safety & security and Industry 4.0.

CEA Tech files 600 patent applications a year, supports 600 partnerships and launches 200 high-tech startups. Its annual turnover is €650 million. CEA Tech is the technology research unit of CEA, which was identified by Thomson Reuters in 2016 as the most innovative research organization in the world.

Airnodes/Anna smart mirror

Anna is the very first smart mirror entirely customizable, designed & built by AirNodes. It empowers communication and has been available for B2B sales since December 2016. Customers can define what they want to display and where the content should appear.
Designed with a gesture bar to manage multi-screens, amongst other functionalities, Anna outperforms all kind of available smart mirrors because it's fully customizable and made with the best quality materials. A back-office interface is available to set up, monitor & drive the mirrors remotely in real time. Few 5-star French hotels & chateau already enjoy Anna's functionalities.

Aryballe

Aryballe Technologies develops portable, connected and universal odor sensors that mimic the human olfactory sense. Based on a unique combination of technologies (optics, bio-chemistry, electronics, IT), our digital nose NeOse Pro allows the detection and identification of odors via their interaction with 40+ biosensors inspired by human olfaction. Digitized odors are stored into a reference database, allowing subsequent matching of new odors. Handy and portable, it is providing to smart home, automation and robotics access for the first time to a universal olfactory sensor able to detect, record and recognize odors.

Clotoo

Clotoo is a French 3D printer manufacturing brand. Our aim is to Uberize 3D printing.

To achieve that we have created 3 things:
• A connected 3D printer with a coloring system,
• A synchronizing network of printers
• An App to connect any web site which sell 3Dprintable models

Clotoo's 3Dprinters owners get automatically rewarded each time they print something from a remote customer through the APP.

Euveka / Mannequins Robots

Euveka is a start-up in France specializing in robotic technologies linked to morphology and biomimicry. We manufacture and develop evolutive and connected mannequins, controlled by design software, to create, produce and sell exact sizes. This technology allows us to precisely control each step of making prototypes and customizing models. Our industrial mannequins are a concentration of mechatronics, computer technologies and materials that rely on a biomimetic process. They are intended to be as close as possible to diverse body morphologies. These solutions are destined to be used by clothing industry professionals.

Go Touch VR

VRtouch is a wireless wearable device designed to touch, interact with and manipulate objects in VR. VRtouch is thimble-shaped and can be worn on each finger of the hand. It can be used with one or more devices at the same time, on one or both hands, (up to six devices). VRtouch applications are in diverse VR fields, such as: professional training, simulation, healthcare, CAD, gaming and many others. VRtouch is ergonomic and its magnetic regulation system allows the one device to fit any finger size. VRtouch is part of a development environment called the VRtouch Development Kit which includes a comprehensive set of tools for VR/AR content creators. It allows the integration of VRtouch tactile feedback features in new and existing VR/AR applications.

Lancey Energy Storage

Lancey heater is the first smart electric heater equipped with a battery and a native energy management system. By fine tuning heating to user's needs and storing cheap off-peak electricity to power the radiator during peak periods, it is up to 50% cheaper to run than other electric space heaters. It is also beneficial to the environment since it almost never consumes electricity during peak demand, when power production releases more CO2. Furthermore, Lancey's heater batteries can provide flexibility services to the grid and contribute to maximizing the self-consumption rate of rooftop photovoltaic systems.

Lili Smart

Lili Smart is an all-in-one solution giving peace of mind to family caregivers, while empowering their loved ones to stay independent and safe at all times, whether they are growing old or suffering from a neurodegenerative disease. The service is composed of an App for caregivers, a smartwatch for patients (measuring their activity) and passive sensors placed at home. Our IA algorithms analyze the person's lifestyle and detect degradation making Lili Smart a powerful tool for risk prevention.

Lovebox.Love

We are a creating the Internet of Feelings, to bring moments of happiness, joy, and love to everyday life. We want to build a network of communication devices that transmit positive emotions. Our first product is the Lovebox, a modern day love note messenger. It's a small wooden wifi-connected device you can gift to your loved one to send them love notes. Out of all the daily notifications and text messages received on their phone, every message in the Lovebox will have a real emotional impact. The heart of the Lovebox spins when a message arrives and until the loved one opens the lid to discover the love note inside.

Moovlab

Moovlab is a B-to-B fitness hardware technology company. The patented technology helps fitness operators create new, digital,workout experiences, in order to boost workout efficiency, motivation and fun. The wearable tracker enables fitness members to simply quantify and follow their performance improvement thanks to real time physical performance measurements and movement recognition. Linked to the digital hub deployed in the fitness centers, fitness members can experiment on individual and group interactive workouts, thanks to data measurement aggregation, driven by challenges and gaming goals. At CES 2017, Moovlab showed its interactive boxing concept. In 2018, Moovlab is revealing its full digital workout platform.

MyBus – Universal, free & ready-to-use m-ticketing solution for public transport. MyBus is going to disrupt the smart cities mobility app market. Why? Because we are the first actor to massively reverse m-ticketing QR Code technology: zero hardware in vehicles = FREE for cities & no extra charges for users! Add our PayAsYouGo innovation and the very new collaborative features and you're ready to live "MaaS MyBus experience" (Mobility as a Service). Selected as an Innovation Awards HONOREE in the Smart Cities category, the CES 2018's central theme, MyBus has arrived on time, all aboard!

Power up

PowerUp, a CEA-LITEN spin-off, doubles the life of Li-ion batteries and facilitates their predictive maintenance. Created in 2017, PowerUp responds to the permanent dilemma of fleet managers of autonomous products with its smart chargers. During each recharge they determine the optimal parameters of voltage and power according to the temperature of the battery, its state-of-charge and its level of degradation. PowerUp also offers a supervision module that centralizes the data of the various battery-powered products. It allows the implementation of a predictive maintenance of Batteries, which is more efficient and less expensive than the periodic and systematic replacement of batteries.

VR Connection

THE FIRST DEDICATED VR/AR HUB IN FRANCE.
Launched in November 2016, VR-Connection's strength lies in its concept: it groups together more than 60 French companies while, at the same time, maintaining individual independence. Combining French know-how in virtual reality & augmented reality, VR-Connection has unlimited expertise and has become proactive by offering innovative solutions to any problem. Our product : Hestia VR, the first VR station. The production and supply, at a very competitive price,of this innovative terminal validates the concept of VR-Connection. It is through the grouping of many specialized start-ups in each area of virtual reality that this boundary VR project was completed.

emlyon business school

Founded in 1872, emlyon business school is one of the oldest in Europe. It is also one of the select group of business schools accredited by three international certifications: AACSB, Equis and AMBA. As such, it is more than worthy of its place among the world's best business schools. Today, emlyon business school has five campuses located in Lyon, Saint-Etienne, Casablanca, Shanghai and Paris.

emlyon business school's mission is to develop "early makers", people able to take control of their destiny, to be an entrepreneurial agent of their own existence with a flair for teamwork, by moving beyond "Do It Yourself" to embrace "Do It Together".

Grenoble Ecole de Management (GEM)

For more than thirty years now, Grenoble Ecole de Management has occupied a leading role amongst business schools all over the world. Our school is certified by three major international accreditations. Our long-standing expertise in Technology and Innovation Management, as well as in Entrepreneurship and its international development, have made Grenoble Ecole de Management a true laboratory of pedagogical innovation. Based in Grenoble, a city of innovation, our mission is to support the performance of local businesses by providing them with skills, knowledge and talents which are adapted to current and future economic issues. There are three main values that drive our institution: excellence, entrepreneurship and engagement. Our ambition is to become a 'school for business for society' and, by virtue of our influence, to inspire not only the world of education and business, but all of their stakeholders, too, the foremost among which is society as a whole.
