FOREWORD

As the top French Region for digital technology, the Auvergne-Rhône-Alpes Region boasts one of the most dynamic ecosystems in Europe and even the world. We welcome all who are driven by a thirst for audacity and innovation. Whether you are a startup or major company, our dynamic Region can match your ambition to create the world of tomorrow.

French Tech is now well known around the world, and Auvergne-Rhône-Alpes, France's number one industrial conurbation, has already launched the digital revolution. Our new digital campus is a lab of the future dedicated to innovative and disruptive digital training models which provide challenging opportunities for our students. With endorsements from leading innovative leading tech companies, the Auvergne-Rhône-Alpes Campus will become the new home of engineering talent for the digital industry in Europe.

From Grenoble to Lyon, from Saint-Etienne to Clermont-Ferrand, our innovative mindset, strong industrial legacy and wide scope of expertise have transformed our region into a "ninja of innovation" to borrow from Gary Shapiro. Auvergne-Rhône-Alpes is home to dynamic centers of excellence and competitiveness clusters such as Minalogic and Imaginove where innovation knows no bounds. Automotive industry, IoT, bioTech, technical textiles, design tech, 3D printers, video games, sportTech... these are just some of the sectors where we have high ambitions and which are growing fast thanks to the vibrancy of our clusters and our centers of competitive excellence.

Once you've seen us at CES, come to the Auvergne-Rhône-Alpes Region, where you'll find everything you need to develop your projects and make your dreams a reality. That is my pledge to you, and the promise of an entire area where innovation is our passion.

I hope you enjoy the 2019 International CES!

Laurent Wauquiez

President of Auvergne-Rhône-Alpes.

Auvergne-Rhône-Alpes region is truly a leader in innovation. From the early age of the silk industry, to the first film-makers in history (Lumiere brothers), up to the era of great medical discoveries (Pasteur), and today in the digital industry, nowhere is that more apparent than in the beautiful and attractive

Auvergne-Rhône-Alpes region, located in the French Alps, in the heart of Europe, and at the foot of Mont Blanc.

In July 2018, we were awarded the worldwide « FabCity » label*, with nine other cities and regions around the world.

Innovation means transformation and opportunities, and the Auvergne-Rhône-Alpes local government is dedicated to the digital transformation process of the economy, and works as a partner with local companies and startups to help them grow and promote the best talents and assets we have to offer.

That's the reason why we are proudly leading a delegation which will give a sneak peek of what our region has to offer in technology innovation, featuring more than 46 companies from Auvergne-Rhône-Alpes region, displaying the latest in artificial intelligence, mobility, smart cities, smart home and more.

According to CTA, 338 French tech companies exhibited at CES 2018, 85% of which were startups presenting at CES' Eureka Park, making France the second largest country represented by tech startups, after the U.S. And even more are expected to attend the 2019 event. The Auvergne-Rhône-Alpes delegation will significantly be part of it.

We are CES ready and are very much looking forward to discovering new technologies and innovative products, meeting new partners from all over the world and being able to welcome inspiring initiatives and projects. We can't wait to get to know you and discuss new opportunities !

Etienne Blanc & Juliette Jarry

1st Vice-Governor & Vice-Governor in charge of Digital Affairs.

*FabLabs aim at democratizing new technologies linked to the digital development and gives the opportunity to a wide public and startups to operate professional and low-priced CNC machines.

Auvergne-Rhône-Alpes, THE TECH REGION

2ND

Most attractive French region for foreign investment

1ST

Industrial region in France in terms of employment

2ND

Region in France in terms of employment in the digital industry (90,000 jobs)

LARGEST EUROPEAN CLUSTER DEDICATED TO THE DIGITAL ECONOMY

550 R&D projects secured total government funding of **€805 million** out of more than **€2 billion** total R&D spending these projects represent

Major companies:

Adept, Autodesk, Awabot, BD, Be-Almerys, Cegid, Criteo, ESKER, Esri, Forgerock, GE, HPE Hewlett Packard Entreprises, Intel, Mathworks, Oracle, Orange Labs, Salesforce, Schneider Electric, Siléane, Softbank, Staubli, STMicroelectronics, Visiati, Naver Labs...

A UNIQUE ECOSYSTEM OF FRENCH TECH-LABELED CITIES

Grenoble #5 most inventive city worldwide (Forbes)

LEADERS & PARTNERS

#1

MINALOGIC,
the regional CES coordinator

Minalogic is a global innovation cluster for digital technologies serving France's Auvergne-Rhône-Alpes region. The cluster supports the region's leading innovators by facilitating networking, fostering collaborative R&D, and providing companies with personalized assistance throughout all phases of business growth. The products and services developed by our members address all industries, from ICT and healthcare to energy and advanced manufacturing.

Founded in 2005

Boasts nearly 400 members

Including 350 industrial members

500 projects certified

550 projects that have secured total government funding of **€850 million** out of more than **€2 billion** total R&D spending these projects represent.

Minalogic has been a certified "Gold Label" Cluster of Excellence since 2012.

AUVERGNE-RHÔNE-ALPES ENTREPRISES

Booth 51266/51067

Auvergne-Rhône-Alpes Entreprises helps companies, in particular startups, to grow in the Auvergne-Rhône-Alpes region, in France and in international markets.

Our missions

Assist companies in their set-up in Auvergne-Rhône-Alpes: technical and financial support, networking...

Support companies in their international and innovation projects, for example by organizing regional booths at trade shows and business conventions dedicated to IT and industrial sectors.

Contribute to the dynamics of regional clusters

Promote the Auvergne-Rhône-Alpes region and its economic development.

LEADERS & PARTNERS

#2

DIGITAL LEAGUE

With more than 530 members from startups to major groups, schools, universities, labs, R&D centres, Digital League is the largest high-tech business network in Auvergne-Rhône-Alpes.

Our goal is to foster economic growth and employment in the region. We support businesses from IT and high-tech industry of all sizes at all stages of their development, especially in 3 areas:

► NETWORKING:

foster relationships between members and industry by means of organized discussion

► GROWTH:

Give companies the tools and the means to grow

► OUTREACH:

Give businesses the opportunity to explore new markets and increase their international exposure

#1 IT cluster in France with + 530 members, 26,000 employees and €2.6 billion turnover.

Aidodys

Aidodys is a company specializing in web accessibility with customized solutions for people suffering from reading difficulties, dyslexia, and visual impairment. The AIDODYS platform customizes and adapts all text making it accessible via user-created profile. Aidodys currently offers 3 services: an internet platform, an application, a sticker (available on all search engines). ADAPT MY WEB is an API to make all websites accessible with a single line of code. AMW makes reading online much more comfortable. The AMW Accessibility Tool facilitates understanding and browsing.

Diabeloop

Diabeloop is a medtech company born out of a medical research project in 2015. Our mission is to relieve people with Type 1 diabetes from the mental load of self-management so they can finally live the life they want. Drawing on excellence in "artificial pancreas" R&D, our first product is an innovative and self-learning system that automates and optimizes insulin delivery in real-time thanks to artificial intelligence.

Dreenk

Dreenk initially developed an IoT device to measure the main characteristics of wine. Today, we are expanding our offer to other beverages.

Baby milk is the unique source of nutrition for a large number of infants around the world. The recurrence of health scandals in recent years has highlighted the difficulties of regulatory agencies in combating adulteration. We now have a solution: a smart device capable of detecting these frauds and preventing the health risk.

Enerbee

Enerbee develops connected and self powered solutions for residential and commercial buildings. Enerbee's innovative products are smart air vents equipped with sensors to control and monitor indoor air quality, offer predictive maintenance of HVAC systems and save energy.

2/ The Tech Region's Night in Vegas - CES, WHAT NEXT ?

Wednesday, January 9th - 7 p.m

Flamingo Hotel - Savoy Room - 3555 South Las Vegas Boulevard, Las Vegas, NV 89109

The Auvergne-Rhône-Alpes Region is pleased to invite you to a networking evening attended by Michelin, Schneider and international partners (Canada, CCEF). This social event is the ideal occasion to meet all the various stakeholders from Auvergne-Rhône-Alpes and explore post-CES opportunities.

EM LYON BUSINESS SCHOOL

Founded in 1872, emlyon business school is one of the oldest in Europe. It is also one of the select group of business schools accredited by three international certifications: AACSB, EQUIS and AMBA. As such, it has earned its place among the world's best business schools.

Today, emlyon business school has five campuses located in Lyon, Saint-Etienne, Casablanca, Shanghai and Paris.

emlyon business school's mission is to develop "early makers", people able to take control of their destiny, to be an leader with a flair for teamwork, by moving beyond "Do It Yourself" to embrace "Do It Together".
