MINALOGIC

Minalogic is a global innovation cluster for digital technologies based in France's Auvergne-Rhône-Alpes region. Minalogic gathers 400 members, among which 300 innovative SMEs/startups as well as the leading-edge research labs and universities in the digital technologies area.

The cluster supports its innovative ecosystem by facilitating networking, fostering collaborative R&D, and accelerating business growth of its members. The products and services developed by its members address

all industries, from ICT and healthcare to energy and advanced manufacturing. Minalogic is a founding member of the Silicon Europe Alliance, formed of 12 ICT clusters of excellence, gathering 2500 members across all Europe

Target markets:

- Aerospace & Defense • Finance & Insurance
- Cities & Buildings • Energy & Environment
- Consumer goods • Farming & Food industry
- Industry 4.0 • Mobility & transport • Healthcare
- Digital infrastructures • Retail & Distribution

DIGITAL LEAGUE

DIGITAL LEAGUE

With more than 530 members from startups to major groups, schools, universities, labs, r&d centres, Digital League is the largest high-tech business network in Auvergne-Rhône-Alpes. Our goal is to foster economic growth and employment in the region. Whatever their size, we support businesses from the IT and high-tech industry in all stages of their development, especially in 4 missions:

- **FEDERATING:** foster relationships between members and outline industry by means of organized discussion

- **GROWING:** Give companies the tools and the means to grow
- **INFLUENCING:** give businesses the opportunity to explore new markets and increase their international exposure
- **TRANSFORM :** Co-create solutions between digital players and players from other sectors of activity and imagine new businesses

#1 IT cluster in France with +530 members, 26.000 employees and 2,6 billions€ turnover.

I-TEN

ITEN is the leading industrial company developing and manufacturing solid-state lithium-ion micro-batteries in the form of SMD components. Such micro-batteries are rechargeable in a few minutes and are not only able to store high energy density but also to deliver power and high peak currents (a few 100 milliampers) over a wide operating temperature range. ITEN's micro-batteries are the ideal solutions to back-up and power up applications in electronics, SSDs, mobile and GPS devices, SSDs, medical devices, smart cards and security tokens, home and building automation, smart cities, wearables and e-textile, IoT and more generally wireless sensor networks

WEGOTO

Wegoto develops innovative solutions for the production and dissemination of geographical data for urban mobility. Wegoto creates geolocalized maps of the gentle movements useful for pedestrians, scooters, bicycles. The data allow to take into account the constraints of each mode of travel and the specific constraints of people with reduced mobility. Multimodal cartography provides continuity of service with other modes of transport, public transport, delivery truck, automobile. Wegoto offers you the first pedestrian-bike GPS taking into account your mobility profile.

The Mirabook turns the smartphone into a laptop.

As people increasingly rely on their smartphones to organize their personal and professional lives, it is becoming evident that the traditional computer has been replaced by the smartphone as the main servant of our digital needs. Our vision is clear, Miraxess unleashes the power of your smartphone, and make it the only computer you will ever need.
