The House of De Rigueur creates high-end and innovative leather accessories, handmade in France, for gentlemen. De Rigueur introduces The Connected Sleeve: the first embedded, smart & elegant solution to charge your smartphone, the perfect marriage of French luxury goods and new technologies.

ELICHENS

Booth 81233

eLichens is a newly founded company with a mission to enable individuals to monitor their environment quality which has direct impact on one's health and wellbeing. The air you breathe becomes a data that you measure. Our goal is to provide "connected environment sensing technology" relying on our patented gas sensors & software.

ENERBEE

Booth 80538

EnerBee is a company developing a ground-breaking micro generator enabling to replace batteries in consumer and industrial smart objects using the power of motion. The company aims to commercialize its first product, a batteryless and wireless dimmer for the mainstream market, at the end of 2016.

ENLAPS

Booth 80920

Time-lapse video solutions (for capturing building/construction, cloud movements, sunsets, plant growth ...) are artistic and informative, but currently reserved only for experienced users. Enlaps is a unique, complete and intuitive solution including a self-sufficient and communicating camera coupled with a web application dedicated to the creation and sharing of time lapses.

GREENWAVES

Booth 80563

GreenWaves Technologies is the first to connect objects at 1Mb/s over miles, for years, at a low cost, and to enable rich IoT services based even on image, sound and motion sensors. We augment and complement existing Low Power Wide Area Network solutions.

HEXO+

Booth 25423

HEXO+ is the world's first entirely autonomous drone that allows you to capture stunning areal footage with the use of a simple smartphone app. With award-winning technology and design, HEXO+ elevates the camera and drone experience with hands-free operation, enabling you to focus on your adventure.

HOLI

Booth 81225

Holi imagines lights that go beyond illumination to improve the way we live. Our last product is SleepCompanion, the light to sleep better. It's a unique light bulb generating the right type of light your body needs at the right moment, controlled by an APP that analyses the physical and environmental factors affecting your sleep so you can improve your sleeping habits.

IN&MOTION

Booth 80858

In&motion designs and manufactures wearable protection systems based on smart detection devices. The company has released the first Smart Skier Airbag, approved by the International Ski Federation in October of 2014 and used in World Cup by Skicross racers. Based on its technology, In&motion develops other protection solutions for sports, drones, industry or health.

KALKIN

Booth 81434

Kalkin designs user-friendly and smart solutions that will attract people fond of nature and adventure. We bring an original digital experience to enjoy the extraordinary landscapes with a combination of connected objects and 3D interactive maps.

KIWI BOX by CHARGING PHONE

Booth 81640

KIWI BOX is a universal charging station with only one power cable that charges up to 6 devices. A single device for all phones/tablets. Fed up with all those wires running in your living room? Thanks to KIWI Box, you will finally have a device that looks good and that can welcome all your friends' phones.

MAGICA VISION

Booth 73051

Magica Vision offers an innovative and unique solution for the visually impaired and the elderly, the Magicabox, "the magic solution for blind people." This electronic box aggregates 29 functions such as a vocalized phone, health applications, electronic sensors to facilitate movements, and is offered at an extremely low price (\$199).

MASKOTT

Booth 81238

Your Learning Companion. We deliver cutting-edge digital solutions for the Education, Training, Culture and Leisure segments. Our ecosystem knowledge base - combined with a highly innovative culture - allows us to create intuitive tools, with a global approach focused on your needs.

THELIA

Booth 81240

Thelia is an open-source smart commerce platform. It provides to businesses an agile solution to develop their omni-channel business by a predictive approach centered on the customer.

PERFECT MEMORY

Booth 81241

Your FAMILLE's got talent! Bring out the best of your community via Perfect Memory's FAMILLE: a content management, enrichment and publishing platform tailor-made for communities. FAMILLE increases the revenue of catalogs owners via a user-centric and collaborative description of digital assets.

SMART & BLUE

Booth 80735

Smart & Blue is showing its first creation, Hydrao, the smart and connected shower head, the first of its kind, that teaches you how to savewater while having fun at the same time. Hydrao is a must-have in these water restricted times!

SMARTMEUP

Booth 80738

Smart Me Up has developed a face recognition technology that can analyze faces from any camera. Any device embedding this artificial intelligence library can thus react smartly according to the profile of a person but also to her behavior and her emotions.

TAPCARDS

Booth 81243

One App, One Digital Album, One Magic Printed Photo, Many Souvenirs. For each of life's best moments, TapCards let you share in its entirety in a smart new way! With the app, create digital albums in one touch, choose the best photo and mail it anywhere in the world. Once received, your « tapcard », the trendy new generation of printed photo, is physically connected to digital album, you and your beloved ones can pop them up on a whim with Smartphones, without any app!

THE AIRBOARD

Booth 81232

We are Creative Thinking professionals, driving the Open Innovation cultural change for major companies. Our mission is to provide tools and processes to accelerate the prototyping and deployment of your next billion dollar idea, with a seamless experience from novice to expert.

UBIANT

Booth 71060

Ubiant presents Luminion, the Smart Community-based Candlestick. Luminion, is an eco-citizen luminous connected object that allows Hemis, Ubiant's cloud solution for energy & well-being management based on Artificial Intelligence, to come to life in homes.

Labs and visitors:

LETI

Booth 81333

Leti, the technological research institute of CEA Tech (France), will present several world-firsts in the fields of augmented reality and 5G at booth 81333 (Hall G, Level 1 at the Sands). Aryballe Technologies, The Airboard and eLichens, three startups that were launched with Leti technology innovations, also will exhibit in Eureka Park.

ALTAMENDI

Visitor

Altamendi is developing Skaping, an interactive application that helps touristic destinations to show their stunning landscapes live and attract customers by using a new generation of Ultra HD immersive cameras.

CHAPIER DEVELOPPEMENT

Visitor

Company specialized in hardware, individualized management of security operations and permissions.

EXOTIC SYSTEMS

Visitor

EXOTIC SYSTEMS turns ideas into projects to invent tomorrow's connected objects today! If you're looking to turn an idea for a connected object sketched on the back of an envelope into a production-ready product, EXOTIC SYSTEMS offers a wide range of custom services (Design > Development > Qualification > Support) that can use a number of ready-made products: sensors, gateways and platforms.

POBRUN

Visitor

PobRun Engineering designs IT and telecom infrastructures, especially for collaborative spaces (lean, videoconference ...). PobRun is also a leader in school equipment and develops jolicours.com, which has become a reference with subscriptions from 56 countries

RTONE

Visitor

Rtone is an innovative one stop company for IoT. It designs a tailor-made solution from hardware to software by integrating the latest communication's protocols depending on your specifications. Rtone has developed products such as a connected smoke detector and a connected protection system... You have the idea, we have the solution!
