

PRESS RELEASE – NOVEMBER 10<sup>TH</sup>, 2015 - For immediate release

## VISION SYSTEMS OPENS A TRADE OFFICE IN SINGAPORE

Vision Systems is a tier-one system supplier in the aeronautics, automotive, railway and marine industries, designing and producing bespoke solutions for specific market segments in complex environments. The company's genuine expertise in solar protection and entertainment & connectivity solutions places it today among the world leaders in these areas. Vision Systems' references include Boeing, Dassault, Airbus Helicopters, HondaJet, SuperJet, Sabena Technics, RUAG, La Compagnie, Alstom, Siemens, Bombardier, Scania, Man, Iveco, SNCF... to name a few.

Last year, Vision Systems opened a production unit in Florida USA to bring the company in closer contact with the major players of the business aviation industry and facilitate trade development opportunities in all of Vision Systems' market segments. Vision Systems pursues its international expansion through a strategic location, Singapore. The opening of a technical commercial office in Singapore last September will assert Vision Systems' presence in South-East Asia, a high-growth sector, particularly in the aeronautics market, but also in the railway and marine markets. Many Asian contacts have already shown a strong interest for Vision Systems' solutions, most particularly an airline company for Electronically Dimmable Windows and a ferry company for our embedded entertainment system.

"We feel that a physical presence in Singapore will allow Vision Systems to increase responsiveness and to have a better appreciation of trade negotiations locally. Our Singaporean Regional Sales Director Thomas Lim will take on business development initiated by Vision Systems Brignais and will participate in search for local partners, to extend our product and service offer to local customers. Our aim is to gain two significant markets by the end of the year", stated Carl Putman, CEO of Vision Systems.

*Headquartered near Lyon, France for more than 80 years, with a production unit in Florida, USA, and a trade office in Singapore, Vision Systems specializes in three activities:*

**Vision Systems Aeronautics** designs and produces innovative solutions for business jets, helicopters, regional and continental aircrafts: solar protection, IFEC & CMS, composite structures.

**Vision Systems Automotive** provides global solutions for specific vehicles, motor-homes, coaches and buses and the railway transport: solar protection, on-board entertainment & connectivity, driver protection doors, driver assistance systems.

**Vision Systems Marine** offers solar protection, entertainment/connectivity & cabin management systems.

*Vision Systems combines complementary skills in electronics, mechanics and composite to provide ever more innovative solutions for cost reduction, heightened safety and improved comfort.*
