# Auvergne-Rhône-Alpes: France's No. 1 Tech Region

## FOREWORD

As the top French region for digital technology, the Auvergne-Rhône-Alpes Region boasts one of the most dynamic ecosystems in Europe and even the world. We welcome all who are driven by a thirst for audacity and innovation. Whether you are a startup or major company, our dynamic region can match your ambition to create the world of tomorrow.

French Tech is now well known around the world, and the Auvergne-Rhône-Alpes region is its best showcase, as the companies in our delegation will demonstrate. They make us proud and prove that Auvergne-Rhône-Alpes is a hub for innovation.

Our region has already launched the digital revolution: it is a major priority for this term and we are leading an unprecedented effort to train our young people and establish the conditions that will make the Auvergne-Rhône-Alpes region a powerful incubator for digital innovation.

From Grenoble to Lyon, Saint-Etienne to Clermont-Ferrand, the richness of our industrial heritage and the diversity of our expertise has made our region a «ninja of innovation,» to borrow from author Gary Shapiro. The future digital campus, overseen by the dynamic Juliette Jarry, Vice-President in charge of digital technology, will provide the agile and innovative training programs that companies need to innovate and grow.

The automotive industry, IoT, biotech, technical textiles, design tech, 3Dprinters, video games, sport tech... we have outstanding ambitions in each of these sectors and industries which are experiencing rapid growth thanks to the vibrancy of our clusters and our centers of competitive excellence. The Region's international activity is also a powerful driver that we are further strengthening with our partners from the Four Motors for Europe, the International Francophone Organization, and a number of African countries.

Once you've seen us at CES, come to the Auvergne-Rhône-Alpes region, where you'll find everything you need to develop your projects and make your dreams a reality. That is my pledge to you, and the promise of an entire region where innovation is our passion.

I hope you enjoy the 2017 International CES!

**Laurent Wauquiez**  
*President Auvergne-Rhône-Alpes*

WAIR

WAIR is the first anti-pollution scarf. It is a fashion accessory doubled with a filter. A filtering case inspired by professional devices is added to the scarf. It maximises the filtration efficiency and avoids a suffocating feeling. An app will give a real time mapping of air quality and will give tips/information to live better with pollution. WAIR is a solution to protect yourself from pollution, effectively and with style.

42TEA

42tea aims to offer food lovers the best taste experience and transform each cup of tea into a delightful moment. With our application, linked with a connected cube, you will be guided throughout each step of the preparation (tea/water quantity, brewing temperature, brewing duration) with unique recommendations calculated for your taste and your taste only! Our application works with all varieties and brands of tea and includes recipes for cold and hot beverages.

# DELEGATION LEADERS AND PARTNERS

The Enterprise Agency helps companies, in particular start-ups, to grow in the Auvergne-Rhône-Alpes region, in France and on the international market.

Our missions:

- Assist companies in their set-up in Auvergne-Rhône-Alpes: technical and financial supports, networking ;
- Support companies in their international and innovation projects, for example by organizing regional booth in trade shows and business conventions dedicated to IT and industrial sectors ;
- Contribute to the dynamics of regional clusters ;
- Promote the Auvergne-Rhône-Alpes region and its economic development.

Minalogic is a global innovation cluster for digital technologies serving France's Auvergne-Rhône-Alpes region. The cluster supports the region's leading innovators by facilitating networking, fostering collaborative R&D, and providing companies with personalized assistance throughout all phases of business growth. The products and services developed by our members address all industries, from ICT

and healthcare to energy and advanced manufacturing. Minalogic was founded in 2005 and today boasts more than 330 members, including 280 companies. The cluster has certified 450 projects that have secured total government funding of 805 million of the more than 2 billion in total R&D spending these projects represent. Minalogic has been a certified «Gold Label» Cluster of Excellence since 2012.

**BUSINESS  
CLUSTER**

**LE CLUST'R  
NUMÉRIQUE**

With more than 310 members, Clust'R Numérique is Auvergne-Rhône-Alpes region's vital arm for digital industry, one of the regional hosts for French tech and newly awarded by The Silver Label of the European Cluster Excellence Initiative.

It aims to help the performance and innovation of his members (Intermediate-sized companies, SMEs, startups, schools

and research laboratories) offering networking, sharing best practices on different themes relating to business and innovation, exports, entrepreneurship, training and expertise.

Our BtoB emblematic event dedicated to the performance and innovation of digital actors, Digital Summ'R, brought together over 600 participants for its first edition in June 2016.

**BUSINESS  
CLUSTER**

**NUMÉLINK**

Created in 2002, Numélink gathers up 300 members, mainly small and medium companies in different sectors of ICT, such as programming services & development, hosting services, data processing, computer network services & telecommunications. The cluster's first aim is to stimulate innovation by developing joint projects;

therefore it already has a wide experience in partnership building aiming at the development of new goods/services. It also aims at sharing resources, implementing collective actions, anticipating future developments and proposing solutions to increase the level of activity and efficiency of the IT sector.

**INNOVATION  
CLUSTER**

**IMAGINOVE**

Since 2006, the Imaginove cluster has federated, and contributed to the expansion of projects and businesses belonging to the digital & content industry in the Auvergne - Rhône-Alpes region in France.

To heighten the dynamic, Imaginove supports regional companies in 3 competitive areas via concrete assistance measures:

- Research & Development / Emergence of Projects
- Business Development and Training / Growth and access to the market
- European Programs and International development
