

# AI 50: AI x IOT x SMART CITY

## ORIGIN

Smart city has become a crucial part for city managers in the process of policy-making and solving common problems within the city: transportation, healthcare, education, housing, environment, and urban sustainability, which are brought about due to high population density. Since 2014, Smart City Summit & Expo (SCSE) has invited professionals from all around the world, including both city and industry leaders, to share their experiences in smart city development, and to showcase innovative smart city solutions.

The booming applications of face recognition, autonomous vehicles, smart commerce and industrial automation have demonstrated the growth of Artificial Intelligence (AI). The combination of AI and Internet of Things (IoT) is now widely applied to the innovation of smart cities, bringing more intelligent and high-quality municipal services to the citizens with new opportunities for the urban economy.

## PURPOSE

To highlight the application of Artificial Intelligence (AI) technology in smart cities, the 2021 Smart City Summit & Expo (SCSE) will launch the third edition of **“AI 50: AI x IoT x Smart City”** campaign, sending invitations to the world’s best AI startup companies to showcase their solutions. The campaign includes an “AI 50 Pavilion” featuring 50 AI startup companies, a series of forum tracks bringing the latest and most innovative ideas from the industry along with abundant networking opportunities and matchmaking activities.

As the biggest smart city platform in Asia, SCSE aims to carry out future visions by:

1. Accelerating the application and implementation of AI technology in smart cities
2. Introducing AI technology to existing industries to encourage industrial transformation

## ORGANIZERS

Taiwan Smart City Solution Alliance

Taipei Computer Association

## QUALIFICATION

**Registered Startup Companies** that are:

1. Registered after January 1<sup>st</sup>, 2015
2. With specific AI applications in smart cities fields
