

Fullstack Developer C++ (F/M)

15 Feb. 2022

Meylan, Isère - France

Id: 240682

Details

A career at our company is an ongoing journey of discovery: our 58,000 people are shaping how the world lives, works and plays through next generation advancements in Healthcare, Life Science and Electronics. For more than 350 years and across the world we have passionately pursued our curiosity to find novel and vibrant ways of enhancing the lives of others.

Your Role

As a Software Developer and Tester for the Raman PAT platform, you will join a team of skilled software and automation engineers to break the next technological locks in innovation and Data Analytics applications.

You design, develop, and deploy highly scalable applications using mainly C++, Qt, Qwt.

You collaborate with the local Agile Scrum Team and the Hardware team to understand the problem domain and come up with creative solutions for design and implementation.

You share and apply your knowledge and proficiency in coding software and create unit tests for software components and ensure adequate coverage is provided.

You solve complex analytical problems independently as well as with peers and participate in code and design reviews with scrum teams.

You mainly work with local team but also with geographically distributed teams while maintaining the highest standards in collaboration and communication.
