Rhône-Alpes

THE DIGITAL APEX

Auvergne-Rhône-Alpes at

JAN 9-12, 2024
LAS VEGAS, NV

MEET
OUR STARTUPS
**BOOTH
60711**

Welcome to the Auvergne-Rhône-Alpes Region pavilion!

Almost 80 companies from the Auvergne-Rhône-Alpes Region are attending CES 2024, the most powerful tech event in the world.

38 of these startups are exhibiting on the regional pavilion (booth 60711), supported by the Auvergne-Rhône-Alpes Region and its partners in the digital ecosystem.

Over 20 companies have also been selected to visit the show with the goal of forging partnerships with potential investors.

A dozen other companies are also exhibiting on the CEA and Business France stands.

The event offers a unique opportunity for our companies to showcase their cutting-edge technology, boost their performance, and hone their competitive edge as they interact with exceptional innovation networks.

FOREWORD

As the world's largest consumer tech show, CES Las Vegas is a key event where the top technological innovations are exclusively revealed every year.

As a region of innovation with a dynamic entrepreneurial ecosystem, Auvergne-Rhône-Alpes has taken part in this major show for a number of years now. This year, the Region is supporting 38 regional startups in Las Vegas and for the first time will welcome them to its regional pavilion, in partnership with the Minalogic competitiveness cluster and the Auvergne-Rhône-Alpes Entreprises attractiveness agency.

The startups present include SocialDream and its VR headset to improve mental health, and Chat3D, a generative AI startup offering a solution for creating objects in 3D from text descriptions.

These businesses embody our territory's dynamism, our industries' innovation and our entrepreneurs' spirit. Our businesses are at the forefront in many areas such as artificial intelligence, connected things and the smart city; they are inventing the health of tomorrow, the industry of the future and new solutions to protect the environment. We are proud of these startups and our backing is in line with their ambition: to make Auvergne-Rhône-Alpes a European Silicon Valley. This goal has resulted in the creation of the Campus Région du numérique which trains our young people in the sectors of tomorrow and provides our startups with talented students keen to address all technological challenges. Campus Région du numérique brings together all the Region's players in the sector and welcomes renowned experts to support our businesses in the digitalisation of their activities. It is the flagship of our digital development policy and, as such, helps diffuse the digital culture over the entire regional territory.

This year too, we are delighted to be attending CES with our economic players. For them, it is a unique opportunity to present their innovations, conquer new markets and enhance their attractiveness. They are our best ambassadors. They embody a spirit of innovation, daring and success which makes them our pride and joy. CES Las Vegas offers the chance to reaffirm our solid support and to show the world that Auvergne-Rhône-Alpes is a region of true innovation.

Laurent Wauquiez,

President of the Auvergne-Rhône-Alpes Region

Every year, this exceptional showcase for the latest developments — CES Las Vegas — celebrates technological innovation and brings together industry's brightest minds.

Technology is evolving at an unprecedented pace, transforming the way we live, work and communicate. In the heart of our mountains and valleys, Auvergne-Rhône-Alpes is home to a remarkable dynamic which translates into a powerful ecosystem of industrial leaders and visionary entrepreneurs. Whether in the fields of health, energy or artificial intelligence, on a daily basis these actors push their limits to create a more connected and smart future.

The CES—a place where the pulse of innovation beats more strongly than ever each year—reflects this permanent evolution and constant revolution, at global level. It is thus that, with Laurent Wauquiez, we work each day to make Auvergne-Rhône-Alpes a region which offers the right environment, encouraging research and development, helping businesses establish themselves here and relocating production.

This year, the Region is supporting 38 startups, so that they can discover the latest innovations which will define our future, and be discovered. Indeed, the products and ideas that we find here today have the potential to redefine and influence the industries of tomorrow. These startups also have the opportunity, at CES, to share achievements from Auvergne-Rhône-Alpes with the world and to turn the spotlight on the know-how of our stakeholders who are working to create a better future for our region thanks to the power of technology.

May these few days at CES reinforce our position as pioneers of innovation, enhancing Auvergne-Rhône-Alpes' standing on the global technology scene.

Stéphanie Pernod,

1st Vice-president

Representative for the economy, relocation,
regional preference and digital systems

MEET ADDITIONAL REGIONAL COMPANIES AT THE SHOW!

In addition to the Auvergne-Rhône-Alpes Region exhibitors, the Region and Auvergne-Rhône-Alpes Entreprises are organizing a personalized visit of CES for a delegation of business leaders and academia. This is the opportunity to introduce them to the latest trends, to propose meetings with exhibitors and representatives as well as conferences.

Participants in the CES 2024 visitors' delegation:

OTHER REGIONAL COMPANIES AT CES

SIDE EVENT

WEDNESDAY JANUARY 10TH

from 6.30 p.m.

THE STRATOSPHERE HOTEL - Panoramic top floor
2000 Las Vegas Blvd S, Las Vegas, NV 89104

Auvergne-Rhône-Alpes

– 2015 –

10th

– 2024 –

Anniversary @CES

Networking Evening in Vegas!

For this special edition, as the Auvergne-Rhône-Alpes Region is proud to celebrate its 10th year in Vegas, we will assemble key international corporate players to share, during a brief round table discussion, insights on their expectations at CES and interactions with startups. It will be an opportunity for us all to learn the dos and don'ts.

Come to motivate, get energized, and “flip the switch on global business opportunity” as CES 2024 promises!
