# GREAT AMBITIONS

**Minalogic** is the digital transformation cluster for France's Auvergne-Rhône-Alpes region, serving the strategic challenges of reindustrialization, national sovereignty, and sustainable development.

As part of phase 5 of the French innovation cluster strategy, launched in early 2023, Minalogic aims to use deeptech's enabling technologies towards a resilient, eco-friendly, and humane reindustrialization of the French territory.

These objectives are directly aligned with those of France 2030 and the Auvergne-Rhône-Alpes region's innovation strategy. Both plans are key to Minalogic's own direction.

**The phase 5 focuses on three strategic axes:**

- Digitalization: to ensure training and transfer on disruptive technologies in order to increase the competitiveness and digital safety of our local economy.
- Technological and industrial sovereignty: to confirm Minalogic's central role in the control of electronic components and of sovereign and safe technologies, both essential to the future of industrial activities.
- Decarbonization: to make digitalization the motor of a smarter, better performing, greener and more responsible industry.

## ECOSYSTEM ANIMATION

- Launch of the **Minalogic Roadshows**, six events dedicated to the animation of our ecosystem's local territories
- **Service provider members** join the membership community
